

A vertical column of medical icons on the left side of the page. From top to bottom: a red heart in a white circle, an orange envelope in a white circle, a stethoscope in a white circle, a clipboard with a document and a person icon, a teal syringe with red drops, a white head profile with a teal target on the forehead and a teal asterisk, a dark blue circle with a white cross and a table, a teal circle with a white and black pill, a white thermometer, and a computer monitor displaying a dashboard with charts and text.

- ✓ sharing electronic care records safely and quickly
- ✓ connecting, local hospitals, community services and GPs
- ✓ improving care and experience for patients

Introducing the Local Care Record

An improved and secure way of sharing information between local hospitals, community teams and GP practices.

The Local Care Record enables the sharing of electronic information between GP practices, hospitals and community services.

The Local Care Record will allow care professionals to view medications, previous treatments, test results and other important information at the touch of button. This will make care safer and quicker by allowing professionals to review all relevant information before making decisions.

To find out more information:

please talk to your GP or care professional, or if you wish for your information not to be shared call **020 7188 8801** or email **gst-tr.GSTPALS@nhs.net**
